

GREEN GOLD

RMB funds clean and predictably priced private power for Harmony.

In a joint venture between AIIM, ACED and Mahlako Financial Services, we acted as the sole mandated lead arranger and funder to provide financing for the development, design, construction, operations and maintenance of three solar renewable projects for Harmony. These projects will help Harmony realise its goals of sustainable mining through a private power solution that will provide long-term value for its mining operations.

In partnership with

Traditional values. Innovative ideas.
